

LABOR NETWORK FOR SUSTAINABILITY

MAKING A LIVING ON A LIVING PLANET

What will it take to recover from the pandemic and mitigate the impacts of climate change?

- Can we create good jobs, support workers and address racial and wealth inequality?
- How do we make sure good jobs and services benefit the communities and workers who have previously been left out of our state's prosperity and been impacted by the pandemic?

Reduce Emissions and Create Careers

- Meeting CA's 2030 emissions reductions goals can create **one million new jobs** - *need to push to make sure they're good jobs.*
- A climate agenda can prioritize union jobs, workers rights and racial justice.
- Support for workers facing displacement and communities dependent on fossil fuels.

Invest in Workers and Communities

- Clean Energy Transition
- Infrastructure & Manufacturing: Rebuild the Golden State
- Expand the Public Sector to Ensure Provision of Critical Services
- Reliable & Accessible Public Transportation
- Universal Healthcare & the Caring Economy
- Expanded Public Education & Job Training

Newsletter: Why a California oil workers union is getting behind clean energy

Chevron oil refinery manager Gary Yesavage stands next to a major piece of equipment that is being overhauled in El Segundo, Calif., on June 14, 2007. (Wally Skalj / Los Angeles Times)

Strong labor, equity, and environmental standards

Workers and communities must be at the forefront of crafting solutions to ensure that the economy we build is one that works better for workers, our communities, and the planet.
