

The Power Grid for the Future: Experience from California and Around the World

Saturday, November 12

15:00 – 16:30

UNFCCC Side Event Room #8

This session will showcase experiences in building the decarbonized and decentralized Grid for the Future through innovation, peer learning, and the power of collaboration. The session will highlight California's leadership in driving power sector innovation, discuss how those and other lessons can and are being applied internationally to drive power sector innovation around the world, and outline collaborative visions emerging from power system operators and practitioners around the world to accelerate the pace of clean energy adoption and grid innovation.

Speakers:

Siva Gunda,
California Energy Commission

Dan Kammen,
University of California, Berkeley

Ron Benioff,
National Renewable Energy
Laboratory

Moderated by
Ellie Cohen, The Climate Center
