Our Mission

**We're working to rapidly
reduce climate pollution at
scale, starting in California.**

We believe in thriving, healthy communities. We envision a future where everyone in California enjoys clean air and water, renewable and reliable energy, healthy food, thriving nature, and more.

Weather Whiplash

Devastating wildfires, toxic smoke, extreme heat, and flooding disproportionately harm people of color and lower-income communities.

- Fossil fuel air pollution causes one in five deaths globally
- Extreme heat kills more people in the U.S. than any other type of hazardous weather
- 2020 CA smoke storm: Three weeks of heavy smoke across California indirectly caused 1,200 deaths
- 7.3 million Californians live within 1 mile of oil or gas well

California Must Lead

California has the tools and know-how to lead on climate. When our elected officials accelerate the transition to clean energy, all of us will benefit.

California must lead on climate once again at the speed and scale required. Our communities deserve accelerated, equitable solutions.
